

Network readiness for **optimized operations**

Telecommunications provider achieves
network readiness and optimized operations
with N-View

Client Background

One of the largest US based telecommunications provider of wireless, data, and voice services operating globally.

Business Challenges

Lack of visibility into network readiness for deploying sensors.

Inability to test network parameters to ensure optimized operations.

Solution

N-View enables you to assess reliable IoT connectivity to determine optimal sensor locations.

Nivid's N-View solution addressed the challenges by providing:

- 01** IoT sensor placement based on RF and connectivity parameters to improve runtime performance and reduce connectivity failures.
- 02** Mobile app and toolkit to determine network readiness in areas of deployment.
- 03** Optimized network operations with N-View's customized tests for measuring throughput, RF optimization, and ping testing.

Results Delivered

Achieve network readiness for IoT deployments for end users and internal networks.

Optimize operations with network testing capabilities powered by N-View.

Nivid Technologies

N-Smart is the flagship product of Nivid Technologies. Nivid is a leading solutions provider of digital ready technology infrastructure and managed services. With deep expertise in delivering world-class infrastructure technology service, Nivid enables enterprises on a global scale to grow strategically and economically.
